PROFESSIONAL SUMMARY

Computer Science student with strong foundations in programming and core CS subjects, with hands-on experience in AI, Data Science, Machine Learning, Web Development, and SAP ABAP. Skilled in building practical solutions and delivering measurable outcomes.

TECHNICAL SKILLS

Languages: C, C++, Python, Java (DSA), ABAP

SAP ABAP: Data Dictionary, Internal Tables, Work Areas, Reports, Open SQL, RAP, S/4HANA Extensibility

Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, OpenCV

Data Science & Analysis: NumPy, Matplotlib, Excel, Data Preprocessing, Model Evaluation

Web Development: HTML, CSS, JavaScript, React.js, Node.js, .NET

Database Management: MySQL, MongoDB

Salesforce: Salesforce CRM, Custom Objects, Flows, SOQL, Salesforce Lightning, Process Automation

WORK EXPERIENCE

SEED Infotech Ltd

Feb 2026 – Mar 2026

SAP ABAP Training (5 Weeks)

- Engineered over 15 ABAP programs leveraging SELECT statements, loops, and Open SQL, accelerating data processing times by an estimated 20% for key business functions.
- Structured and defined complex data models using ABAP Dictionary, including tables, data elements, and domains, enhancing data integrity and system performance by 15%.
- Built 2 RAP-based CRUD applications using ABAP RESTful Application Programming Model, cutting manual data-entry steps by 30%.
- Learned SAP S/4HANA extensibility and gained hands-on SAP development experience.

C-DAC Patna (Government Organization)

Jun 2024 – Jul 2024

Python for AI and Data Science (4 Weeks)

- Implemented ML/DL models on datasets exceeding 1M records, reducing training time by 15%.
- Increased model accuracy from 82% to 90% through hyperparameter tuning.
- Automated preprocessing workflows reducing manual data preparation time by 40%.

PROJECTS

DDoS Attack Detection using Machine and Deep Learning

- Built hybrid intrusion detection system using Logistic Regression, Decision Tree, and KNN ensemble on CIC-IDS 2019 dataset (2M+ network flow records).
- Applied PCA for dimensionality reduction improving efficiency by 32%.
- Developed deep learning model using TensorFlow/Keras, achieving 97% detection accuracy across 3 attack categories.

Deepfake Video Detection using CNN and LSTM

- Designed deepfake detection system using CNN+LSTM on FaceForensics++ dataset (1,000+ video samples).
- Preprocessed 10,000+ video frames using OpenCV and engineered time-series features across 5-frame sequential batches for LSTM input.
- Achieved 94% accuracy detecting manipulated videos on the held-out test set.

ACHIEVEMENTS

- Secured 1st position in C-DAC AI and Data Science Training batch.
- Ranked 1st in the B.Tech Computer Science program at Amity University Patna.
- Solved 150+ problems on LeetCode (leetcode.com/u/husnahussain).
- AWS and Google Cloud Practitioner.

CERTIFICATIONS

• C-DAC Patna – Python for AI and Data Science	Verify
• SWAYAM – Programming in Python	Verify
• NPTEL – Programming in Java	Verify
• SAP Certified Back-end Developer – ABAP Cloud	Verify
• CodingBlocks – Master DSA with Java	Verify

EDUCATION

B.Tech in Computer Science — Amity University Patna

2022 – 2026

CGPA: 9.65
